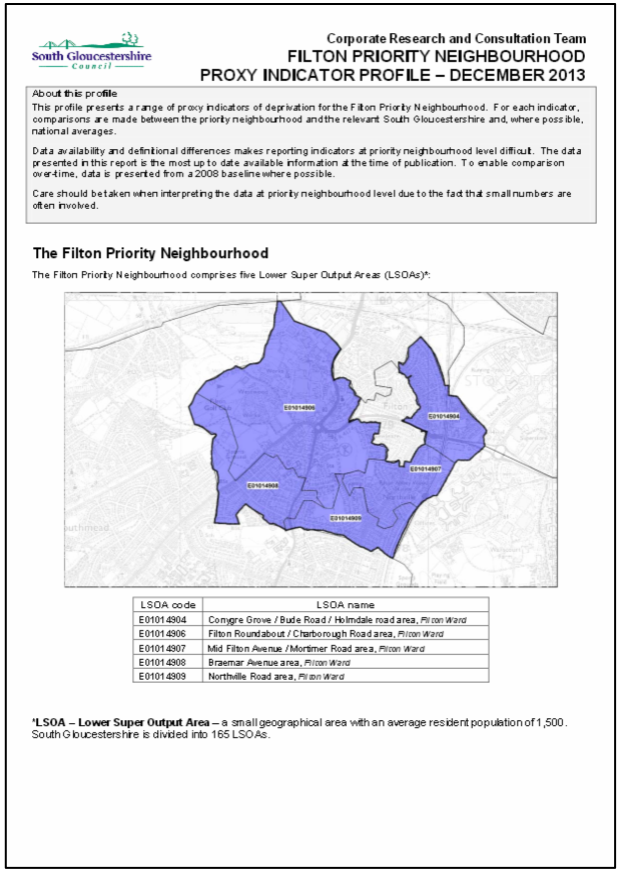
# 2013 Proxy Indicators Reports…



Corporate Research and Consultation Team
FILTON PRIORITY NEIGHBOURHOOD
PROXY INDICATOR PROFILE – DECEMBER 2013

About this profile

This profile presents a range of proxy indicators of deprivation for the Filton Priority Neighbourhood. For each indicator, comparisons are made between the priority neighbourhood and the relevant South Gloucestershire and, where possible, national averages.

Data availability and definitional differences makes reporting indicators at priority neighbourhood level difficult. The data presented in this report is the most up to date available information at the time of publication. To enable comparison over-time, data is presented from a 2008 baseline where possible.

Care should be taken when interpreting the data at priority neighbourhood level due to the fact that small numbers are often involved.

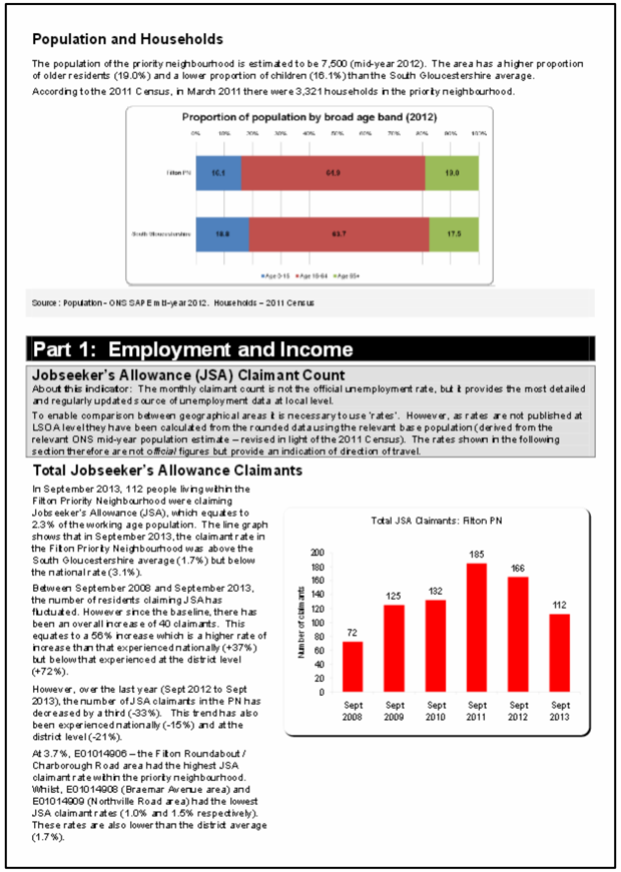
**The Filton Priority Neighbourhood**

The Filton Priority Neighbourhood comprises five Lower Super Output Areas (LSOAs)*:

E01014906
E01014904
E01014907
E01014908
E01014909
Filton
Southmead

| LSOA code | LSOA name |
|---|---|
| E01014904 | Conygre Grove / Bude Road / Holmdale road area, *Filton Ward* |
| E01014906 | Filton Roundabout / Charborough Road area, *Filton Ward* |
| E01014907 | Mid Filton Avenue / Mortimer Road area, *Filton Ward* |
| E01014908 | Braemar Avenue area, *Filton Ward* |
| E01014909 | Northville Road area, *Filton Ward* |

***LSOA – Lower Super Output Area** – a small geographical area with an average resident population of 1,500. South Gloucestershire is divided into 165 LSOAs.



**Population and Households**

The population of the priority neighbourhood is estimated to be 7,500 (mid-year 2012). The area has a higher proportion of older residents (19.0%) and a lower proportion of children (16.1%) than the South Gloucestershire average.

According to the 2011 Census, in March 2011 there were 3,321 households in the priority neighbourhood.

**Part 1: Employment and Income**

**Jobseeker's Allowance (JSA) Claimant Count**

About this indicator: The monthly claimant count is not the official unemployment rate, but it provides the most detailed and regularly updated source of unemployment data at local level.

To enable comparison between geographical areas it is necessary to use 'rates'. However, as rates are not published at LSOA level they have been calculated from the rounded data using the relevant base population (derived from the relevant ONS mid-year population estimate – revised in light of the 2011 Census). The rates shown in the following section therefore are not *official* figures but provide an indication of direction of travel.

**Total Jobseeker's Allowance Claimants**

In September 2013, 112 people living within the Filton Priority Neighbourhood were claiming Jobseeker's Allowance (JSA), which equates to 2.3% of the working age population. The line graph shows that in September 2013, the claimant rate in the Filton Priority Neighbourhood was above the South Gloucestershire average (1.7%) but below the national rate (3.1%).

Between September 2008 and September 2013, the number of residents claiming JSA has fluctuated. However since the baseline, there has been an overall increase of 40 claimants. This equates to a 56% increase which is a higher rate of increase than that experienced nationally (+37%) but below that experienced at the district level (+72%).

However, over the last year (Sept 2012 to Sept 2013), the number of JSA claimants in the PN has decreased by a third (-33%). This trend has also been experienced nationally (-15%) and at the district level (-21%).

At 3.7%, E01014906 – the Filton Roundabout / Charborough Road area had the highest JSA claimant rate within the priority neighbourhood. Whilst, E01014908 (Braemar Avenue area) and E01014909 (Northville Road area) had the lowest JSA claimant rates (1.0% and 1.5% respectively). These rates are also lower than the district average (1.7%).

**Part 2: Educational attainment and training (resident pupils)**

**Early Years Foundation Stage Profile: Pupils achieving a good level of development.**

About this indicator: The Early Years Foundation Stage Profile (EYFSP) is the statutory assessment requirement for children who are reaching the end of the Foundation Stage – typically 5 year old pupils. A 'good' level of development is defined as pupils scoring 6 or more points across all 7 assessment scales of Personal, Social and Emotional development (PSE) and Communication, Language and Literacy areas of learning (CLL) and scoring 78 or more points across all scales of the EYFSP.

In 2011/12, 62% of Early Years Foundation Stage Profile (EYSFP) pupils living in the Filton Priority Neighbourhood achieved a 'good' level of development. This is slightly lower than the rate achieved in previous year, although not (statistically) significantly so. The achievement rate of children living in the PN is lower than both the local authority and national averages (70% and 64% respectively), although there are no statistically significant differences between the PN rate and these local or national rates.

**GCSE and equivalent results for Young People: Average capped GCSE and equivalent point score per pupil at the end of Key Stage 4**

About this dataset: It measures the attainment of Key Stage 4 pupils resident within the priority neighbourhood. The output measure for each pupil is capped at the pupil's best eight GCSE (and equivalent) qualifications.

In 2011/12, the average capped GCSE and equivalent points at the end of Key Stage 4 for pupils living in the Filton Priority Neighbourhood was 342.8 points, which is in line with the local and national averages (343.5 and 343.3 points respectively). The graph illustrates that the level of overall attainment for residents in the PN improved in 2011/12 compared to 2009/10 and 2010/11. Filton PN displayed the highest overall performance at Key Stage 4 compared to the other five PN areas in 2011/12.

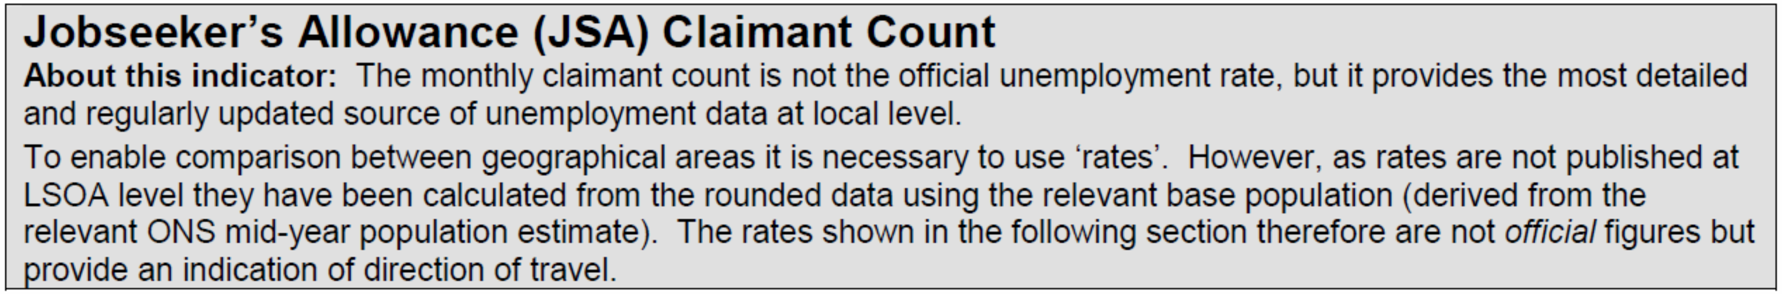
# 1. Total JSA Claimants

## (residents aged 16-64 years)



**Jobseeker's Allowance (JSA) Claimant Count**

**About this indicator:** The monthly claimant count is not the official unemployment rate, but it provides the most detailed and regularly updated source of unemployment data at local level.

To enable comparison between geographical areas it is necessary to use 'rates'. However, as rates are not published at LSOA level they have been calculated from the rounded data using the relevant base population (derived from the relevant ONS mid-year population estimate). The rates shown in the following section therefore are not *official* figures but provide an indication of direction of travel.

# 4. Key out-of-work benefits

**About this indicator:** The key benefits which comprise this 'client group' indicator are: Carer's Allowance; Disability Living Allowance; Incapacity Benefit/Severe Disablement Allowance; Income Support; Jobseeker's Allowance; Pension Credit; and Widow's Benefit. The main advantage of using this client group dataset is that the double counting of claimants of multiple benefits has been removed which provides a more accurate picture of benefit claiming and worklessness at a small area level.

**Caveat:** It is important to note that to prevent the disclosure of confidential information this dataset is rounded at source (to the nearest 5). Therefore when rounded data is aggregated to calculate the priority neighbourhood total, the aggregated values may over or under represent the true value.
Care should be taken when interpreting the data at priority neighbourhood level due to the fact that small numbers are often involved: an apparent increase or decrease over time might not be as considerable as it might appear..

# Part 2. Educational attainment and training

# Early Years Foundation pupils achieving a good level of development

**About this indicator:** The Early Years Foundation Stage Profile (EYFSP) is the statutory assessment requirement for children who are reaching the end of the Foundation Stage – typically 5 year old pupils. A ‘good’ level of development is defined as pupils scoring 6 or more points across all 7 assessment scales of Personal, Social and Emotional development (PSE) and Communication, Language and Literacy areas of learning (CLL) and scoring 78 or more points across all scales of the EYFSP.

# EYF pupils achieving a good level of development

# Part 3. Crime

Unfortunately we are currently unable to provide an update on crime levels in the Priority Neighbourhoods. The previous analysis was carried out using data provided on the 'ASPIRE' data repository system; however due to technical difficulties data is no longer available via this route. An alternative solution for providing the data is being sought but has not yet been found, therefore we will continue to be unable to provide any updated information until further notice.

# Part 4. Health

- To be covered by Matt Pearce…

DRAFT

# Conclusions and further information…

- For most economic, employment and educational attainment indicators the Filton Priority Neighbourhood generally performs below the South Gloucestershire average

- But in the vast majority of cases, the Filton PN performs better than the other 5 priority neighbourhoods in South Gloucestershire

- A range of analysis from different sources, including:
  - Census
  - Demographics
  - Economic briefings and
  - Priority neighbourhood reports

is available from: **www.southglos.gov.uk/statistics**
