

Dyrham and Hinton Parish Biodiversity Action Plan

Introduction

Biodiversity is the whole variety of life on Earth, all species of plants and animals, their genetic variation and the habitats and ecosystems they are part of. It includes not just the rare or the threatened but also the wildlife that is familiar to us in the places where we live and work. Biodiversity is important for its own sake, along with the many benefits we derive from the natural environment – products like food, fibre, wood, and water; services like pollination, nutrient cycling, soil formation, water purification, flood defence and opportunities for reflection and recreation – all are critical for our wellbeing and survival.

All public authorities, including South Gloucestershire Council, parish and town councils have a legal duty to have regard to conserving biodiversity while carrying out their activities (section 40 Natural Environment and Rural Communities (NERC) Act 2006).

Biodiversity Audit

A major step to knowing what you can do for local wildlife is to know what you have already got. This document will help you with this but it is just a start. Ultimately the protection and enhancement of the local natural environment requires the interest and enthusiasm of the local community.

Designated sites for nature conservation

Internationally important wildlife sites (i.e Ramsar sites (Wetlands of International Importance), Special Areas of Conservation (SAC), Special Protected Areas (SPAs)): None

Nationally important wildlife sites (i.e Site of Special Scientific Interest (SSSI), Local Nature Reserve): None but some of the Parish is within the Cotswolds Area of Outstanding Natural Beauty.

Locally important wildlife sites (i.e Site of Nature Conservation Interest (SNCI) :

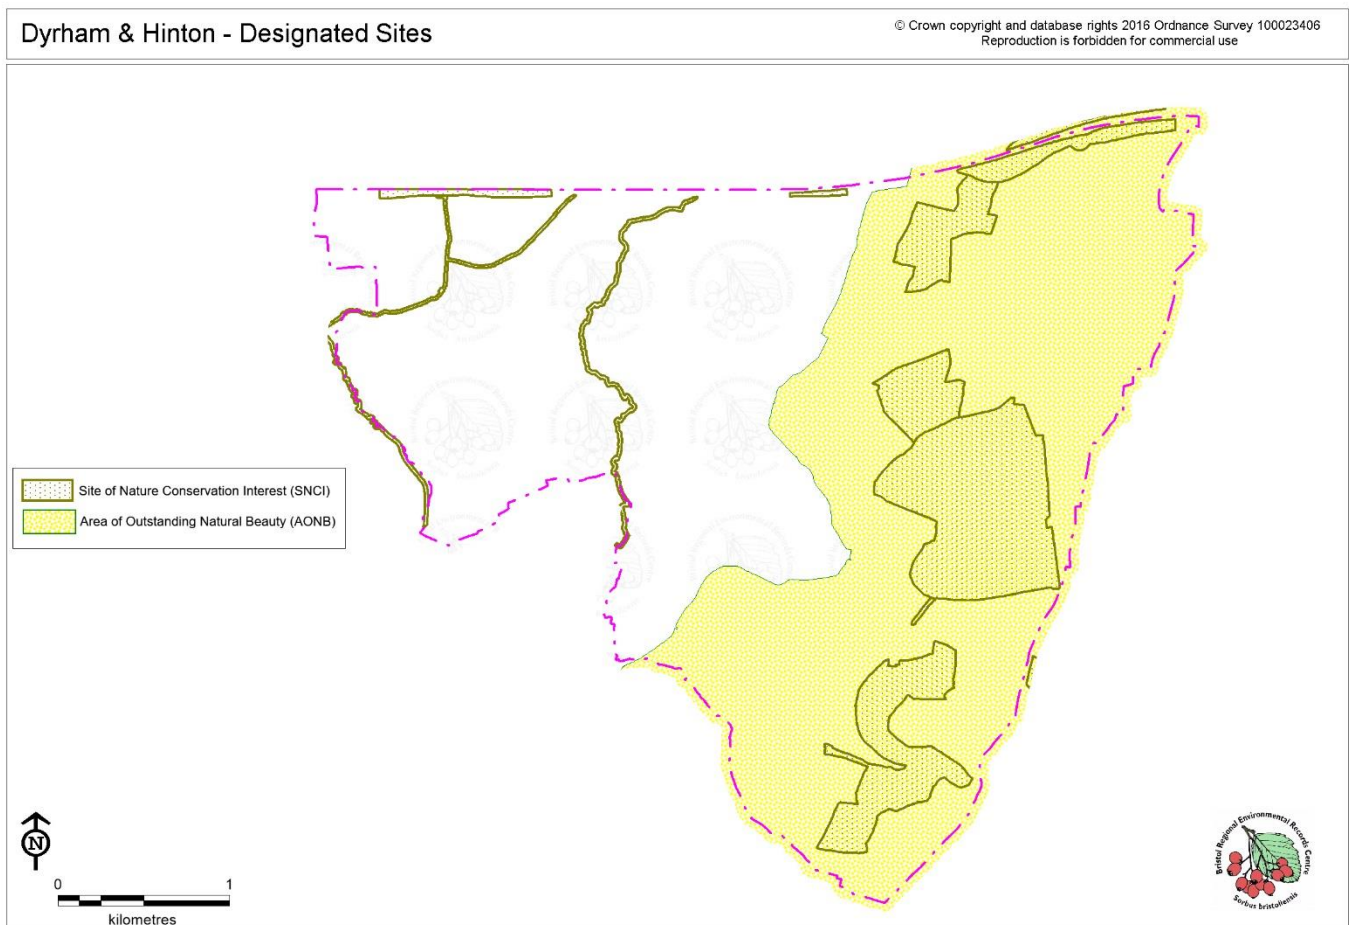

- Dyrham Woods and Sands Farm
- Dyrham Park (National Trust)
- Dyrham Hill
- River Boyde west of Hinton
- Feltham Brook (part of) east of Pucklechurch
- Verge of M4 near Burbarrow Lane
- Verge of M4 north of Ford Farm

- Fields around Holloway Brake
- Verge of M4 west of Tormarton junction

Please see map and/or contact Bristol Regional Environmental Records Centre (BRERC)
<http://www.brerc.org.uk/index.htm> for further information.

Other sites

- Roadside Nature Reserves at Gorse Lane and Sandhill

Habitats of Principle Importance (Section 41 NERC Act 2006) - the most important habitats for wildlife and a focus for conservation action

The following priority habitats have been recorded in the parish. Please see priority habitat map for further information. Please note that not all priority habitat has been mapped.

- Lowland Calcareous Grassland
- Lowland Meadows
- Lowland Mixed Deciduous Woodland
- Woodpasture and Parkland (see MAGIC)

Dyrham & Hinton - Priority Habitats

Reproduction is forbidden for commercial use

Species of Principle Importance (Section 41 NERC Act 2006) – the most important species for the purpose of conserving biodiversity.

The following priority species have been recorded in the parish. This list was compiled by BRERC (2016). European protected species are not included.

Blood-vein	Ghost Moth	Linnet	Small Emerald
Brown Hare	Harvest Mouse	Marsh Tit	Small Heath
Buff Ermine	Hedgehog	Polecat	Small Square-spot
Bullfinch	Herring Gull	Reed Bunting	Song Thrush
Common Toad	House Sparrow	Rustic	Spotted Flycatcher
Corn Bunting	Lackey	Shoulder-striped	Starling
		Wainscot	
Cuckoo	Lapwing	Skylark	Tree Sparrow
Dunnock	Large Nutmeg	Small Blue	Turtle Dove
Water Vole	White Ermine	Wood Warbler	Yellowhammer

Further information on sites, habitats and species <http://www.brerc.org.uk/i-maps/index.html> are available from BRERC. National priority habitat inventories and designations are also available to view online at MAGIC <http://www.magic.gov.uk/>

Biodiversity Action

How local conservation projects can contribute... taken from DEFRA's, A simple guide to Biodiversity 2020 and progress update (July 2013).

Biodiversity 2020 deliberately avoids setting specific targets and actions for local areas because Government believes that local people and organisations are best placed to decide how to implement the strategy in the most appropriate way for their area or situation. However, local projects are particularly likely to be making a key contribution to the strategy if they involve:

1. Improving the quality of existing habitats so they are able to better support biodiversity;
 - Survey work on the above sites and habitats (with landowner permission) could be commissioned from a knowledgeable resident, student, local conservation group or professional with management recommendations included for future action if necessary.

2. Creating new areas of priority habitat;

- Create species rich wildflower grassland by restoring some degraded grassland. Woodland and parkland could be increased through increased tree cover.

3. Identifying and managing ways for habitats to be linked together to create new networks for wildlife;

- Use ecological network and opportunity maps to identify areas for enhancement.
- Investigate possible links such as gapping up a key hedgerow between woods.

4. Managing biodiversity at the scale of whole natural systems and landscapes;

- Consider linking to local and national wildlife projects such as B-Lines which aims to reconnect landscapes through a route of wildflowers. Dyrham and Hinton are within the Cotswold focus area which is a priority for Avon Wildlife Trust.

5. Engaging people in new ways that increases the number of people who understand and value nature;

- Continue with Dyrham Park National Trust events, village open gardens etc.

This Biodiversity Action Plan (BAP) is just the beginning and should be read in conjunction with the updated **South Gloucestershire Biodiversity Action Plan (2016 - 2026)** which provides the strategic overview. It is by no means exhaustive and as a community, you may have more ideas for action that you would like to take forward in coming years. It is intended that this BAP is shared, updated and monitored by the local authority, by parishes, the Biodiversity Action Group (BAG) and any other interested parties.
